We claim:

1   1.   A project development Website comprising at least one Web page,

2   wherein a user can select between categories to concurrently search for

3   multiple aspects of a project thereby locating project directed resources

4   related to said multiple aspects.

1   2.   The project development Website of claim 1, further comprising:

2   a multi-dimensional knowledge base defined by said categories, said

3   multi-dimensional knowledge base being an indexed database indexed

4   according to said categories and having a plurality of nodes, each said

5   node being a URL.

1   3.   The project development Website of claim 2 wherein said categories

2   are selected from the group consisting of Life Cycle, Operating Region,

3   Operating Country, Industry Sector, and Supporting Services.

1   4.   The project development Website of claim 2, wherein said category

2   is Life Cycle, further comprising:

3   project phases for determining a project's progress where each said

4   phase is defined according to functional tasks, said project directed

5   resources being located using said project phase as a selection criteria.

1   5.   The project development Website of claim 2, wherein each said

2   URL has its own attributes.

1   6.   The project development Website of claim 1, further comprising:

2   a user key for entering the Website.

1   7.   The project development Website of claim 6, wherein said key is a

2   user password.

1   8.   A project development Website wherein a user selects between

2   categories to concurrently search for multiple aspects of a project thereby

3   locating project directed resources wherein said multiple aspects of said

4   project are pre-selected Uniform Resource Locators (URLs).

1   9.   A project development Website comprising at least one Web page

2   for navigating through pre-defined categories to locate project directed

3   resources identified in a multi-dimensional knowledge base wherein:

4   said multi-dimensional knowledge base being an indexed database

5   and having multiple entry points, where said pre-defined categories are

6   said multiple entry points;

7   each said pre-defined category having sub-categories for navigating

8   through said multi-dimensional knowledge base to locate said project

9   directed resources; and

10   each said project directed resources being a URL.

1   10.   The project development Website of claim 8, wherein one of said

2   pre-defined categories is selected from the group consisting of Life Cycle,

3   Operating Region, Operating Country, Industry Sector, and Supporting

4   Services.

1   11.   A method for using an Internet appliance to develop a business

2   project on a project development Website, comprising the steps of:

3   using said Internet appliance, initiating a navigated search of an indexed

4   knowledge base;

5   selecting a super category from the group consisting of Life Cycle,

6   Operating Region, Operating Country, Industry Sector, and Supporting

7   Services, where said super categories are indexed in said indexed

8   knowledge base;

9   searching said indexed knowledge base for Internet resources

10   corresponding to said navigated search of said selected super category;

11   and

12   displaying on said Internet appliance, a group of pertinent URLs.

1   12.   The method of claim 11, where said selected super category is Life

2   Cycle, further comprising the step of:

3   identifying the project phase of said Life Cycle said project is in.

1   13.   The method of claim 12, wherein said project phase limits said

2   navigated search of said indexed knowledge base to only those URL's

3   whose associated Website provides information, data, or services

4   applicable to said project phase.

1   14.   The method of claim 11, wherein each URL in said group of

2   pertinent URLs has its own attributes.

1   15.   The method of claim 11, where the step of initiating a navigated

2   search of an indexed knowledge base further comprises the step of:

3   entering said project development Website by using a key.

1   16.   The method of claim 15, wherein said key is a user password.

2   17.   A method for using an Internet appliance to develop a business

3   project on a project development Website, comprising the steps of:

4   using said Internet appliance;

5   initiating a search of an indexed knowledge base where said search

6   may be a navigated search of pre-determined super categories or a

7   keyword search;

8   selecting a super category from the group consisting of Life Cycle,

9   Operating Region, Operating Country, Industry Sector, and Supporting

10   Services, where said super categories are indexed in said indexed

11   knowledge base, if a navigated search is selected;

12   searching said indexed knowledge base for Internet resources

13   corresponding to said navigated search of said selected super category;

14   displaying on said Internet appliance, a group of pertinent URLs

15   corresponding to said navigated search;

16   entering a keyword, if a keyword search is selected;

17   searching said indexed knowledge base for Internet resources

18   corresponding to said keyword; and

19   displaying on said Internet appliance, a group of pertinent URLs

20   corresponding to said keyword search.

1   18.   The method of claim 17, wherein said group of pertinent URLs is a

2   group of URLs each being identified to an Internet Website, where more

3   than one of said Internet Websites are service provider, further

4   comprising the steps of:

5   using a secure deal space;

6   requesting bids from said service providers;

7   receiving said bids from said service providers;

8   selecting a bid from among said received bids, thereby choosing

9   one of said service providers; and

10   negotiating a contract for services from said selected service

11   provider.
